

Health Enterprise Risk Management

When it comes to enterprise risk management in the health care industry, there are any number of compliance issues that need to be reviewed, depending on your particular circumstance. Our lawyers are experienced and capable of handling issues related to licensing, fraud and abuse, anti-kickback laws, Stark physician self-referral laws, Medicare and Medicaid certifications, third-party payor contracts HIPAA compliance, and many of the other issues facing health care businesses today.

Our Services

- + **Anti-kickback/Stark physician self-referral laws:** identifying potential issues; determining whether a safe harbor is available
- + **Medicare/Medicaid certification:** addressing issues related to becoming a Medicare or Medicaid provider; maintaining approved provider status
- + **Licensing:** advising providers on required licenses, obtaining relevant licenses and transferring licenses; counseling clients on licensing matters with state medical boards, state boards of pharmacy, the FDA and the U.S. Drug Enforcement Administration
- + **Regulatory compliance:** advising health care providers on licensing, registration, credentialing and accreditation issues
